

Lightweight Headsets

Lightweight headsets are designed for simple communication requirements without all the bulk or multiple radio cables. They are ideal for hospitality, retail, recreation, security, entertainment and any other applications that require non-obtrusive means for two-way radio communications.

These come in a variety of styles and specific models can come in a "modular configuration." This means that if you were to change out your existing radios for a different model, or even a different brand, all you would need to do is expense a new radio cable instead of an entirely new system. This saves departments additional funds that can be spent on other necessary items.

Most styles can be further advanced with custom-fit earpieces for better overall comfort value and isolation of the radio transmission straight into the ear. This prevents conversation to be heard by third parties and allows the user to reduce the amount of volume needed to hear the communications clearly.

Custom earpieces

Custom earpieces add value in what is being heard and understood during a critical operation or general patrol duties, improving radio traffic communication between officers and dispatch.

E.A.R. Chameleon Ears™ are super soft hydrophobic silicone earplugs. We can outfit these molds with acoustical filters which provide excellent protection against high level impulse noises and excellent speech recognition for motorcyclists, dentists, shooting enthusiasts and musicians.

Available in a variety of brilliant solid colors as well as ones which change colors or glow in the dark.

Note: This product is produced for listening to audio/communication devices. Please remain aware of the dangers of listening to these devices at a loud volume level (85dB+). OSHA regulations state a volume of 80-85dB is safe for an eight hour period of time. If you are concerned about your hearing, please consult a hearing specialist who can advise you about your safety levels with your audio device.

Radio Compatibility

Motorola	Relm	Kenwood
M/A Com	Maxon	E.F. Johnson
Thales	Tait	Yaesu-Vertex
