

Competition Sports Monitors

E.A.R.'s Competition Sports Monitors virtually eliminate the need for bulky headsets. Many sports professionals such as golfers, trap shooters, motorcyclists, road bicyclists, etc., are using Sports Monitors to shut out background noise while listening to music which enhances their concentration and/or reduces stress.

The Competition Sports Monitors can be made for monaural or stereo electronic systems and can be custom fit. (Note: generic units can be upgraded to custom fit if later desired.)

We have made these compatible with many electronic devices such as radios, CD or cassette players, portable TVs, home stereos, computers, scanners, etc. They are also wonderful for passengers traveling on commercial airlines who listen to on-board music and movies. We've even tried them on hand-held pocket PCs!

Customizing your monitors will give your them personality and character specific to you. To view a few examples, please see our Chameleon Ear™ product line page at our website, www.earinc.com. Generic units come in Canal or Flanged styles as shown, above right.

Note: This product is produced for listening to audio/communication devices. Please remain aware of the dangers of listening to these devices at a loud volume level (85dB+). OSHA regulations state a volume of 80-85dB is safe for an eight hour period of time. If you are concerned about your hearing, please consult a hearing specialist who can advise you about your safety levels with your audio device.

Optional Airline Jack

Custom, Canal, Flanged
